

Anatomy & Physiology 12

Instructor: Deborah Goertz

Email: dgoertz@sd40.bc.ca

Description

The human body is the focus of this course. As you learn the body's biochemistry, anatomy and physiology, you will be challenged with the bigger question of how the different parts of the body interrelate at the molecular and organ systems level to maintain health.

Life Sciences 11 is NOT a prerequisite for Anatomy & Physiology 12. This course is often a required course for post-secondary health sciences programs. Curriculum details can be found at: <https://curriculum.gov.bc.ca/curriculum/science/12/anatomy-and-physiology>.

Resources

Lessons and assessments are online and use a combination of text and short videos, interactive animated exercises and links to websites to help you understand the concepts.

Optional Resource: The textbook '*Inquiry into Life*' by Sylvia Mader (10th Ed.) is a **NOT required** but some students may want to use it as a resource.

For adult students: there is a \$100 textbook deposit which is fully refunded once you complete the course and return it within one year.

Assessment

Your understanding is assessed through Module Tests (~60%) and project work(~40%). Quizzes provide a way to check your understanding and then to get feedback and help from your instructor. Until our location re-opens, all assessments are completed from home.

Note: The expectation is that students will complete their online course within a 4-5 month period of time. Consult your teacher if additional time is needed.

To Begin

[Register](#), then log into your course from our [website](#) and follow the instructions on the Home Page. Contact the course instructor if you have any questions.

All the best as you pursue your studies!
