

New Westminster Online Learning School

Course Title and Grade: Math 10 Refresher for Adults

Course Description

This course is comprised of three Modules starting with math fundamentals including fractions and ratios. The course progresses to intermediate algebra including right-angled trigonometry and linear geometry. Students can expect to move to a higher level math like Foundations Math 11 or Pre-Calculus Math 11 upon successful completion.

Course Expectation

Students are expected to login regularly. Expect to complete this in approximately four months.
