

## New Westminster Online Learning School

### Chemistry 11:

#### Course Description

This is a “toolbox” course introducing students to the language, computational skills, and foundational concepts of matter. It is a prerequisite for Chemistry 12.

#### Course Expectations

Students are expected to complete the first unit within 2 weeks of enrolling, to log in and make progress each week, and to finish the course within a 4–5-month period of time. They are expected to be in communication with their teacher when they have questions and if they need additional time. Students are expected to submit their own work, and to cite sources when using the work of others.

#### Enduring Understanding/Big Ideas

Students will focus on the following:

- Atoms and molecules are the building blocks of matter.
- Organic chemistry and its applications have significant implications for human health, society, and the environment.
- The mole is a quantity used to make atoms and molecules measurable.
- Matter and energy are conserved in chemical reactions.
- Solubility within a solution is determined by the nature of the solute and the solvent.

#### Specific Learning Outcomes

Curriculum details can be found at:

<https://curriculum.gov.bc.ca/curriculum/science/11/chemistry>.

#### Course Content

Unit 1	Introductory Concepts & Skills
Unit 2	Matter
Unit 3	Atoms & the Periodic Table
Unit 4	Names & Formulas
Unit 5	The Mole

Unit 6	Chemical Reactions
Unit 7	Stoichiometry
Unit 8	Solution Chemistry
Unit 9	Organic Chemistry

### Student Learning Activities and Strategies

All materials, lessons, and assessments are online and use a combination of text, short videos, interactive animations, links to websites, and practice questions and exercises to help students understand the concepts. Now, while the materials are online, it will still be helpful for students to keep an organized binder with notes taken from video lessons, handouts they might want to print, as well as their work for questions and exercises.

### Assessment

Student understanding is assessed through assignments, quizzes, conversations with the teacher and module tests. Quizzes provide a way to check understanding and get feedback and help from the teacher. All assessments are completed from home; however, students might be required to come to a supervised location to write a test.

Ministry assessment and reporting information can be found at:  
<https://curriculum.gov.bc.ca/classroom-assessment>.

### Evaluation

Your final mark is determined by the progress you have made in understanding key concepts and skills as demonstrated on assignments (~40%) and module tests (~60%) throughout the course.

### Resources

Lesson materials are online, which means access to reliable high-speed internet is essential, as is that students use a laptop, desktop, or Chromebook.  
Adult student will need to purchase the Hebden Chemistry 11 Workbook (\$30) from our [office](#) for the practice exercises. A scientific (not graphing) calculator is required.
